SAN FRANCISCO, Nov. 03, 2023 (GLOBE NEWSWIRE) -- ContextLogic Inc. (d/b/a Wish) (NASDAQ: WISH), one of the world's largest mobile ecommerce platforms, is proud to announce the release of its inaugural '[Anti-Counterfeiting Report](#)'. The publication of the report represents a significant step in Wish's ongoing commitment to combating the listing and sale of counterfeit goods on its platform.

Wish's first 'Anti-Counterfeiting Report' provides an overview of the tools and resources it has in place to detect and enforce against the listing or sale of allegedly counterfeit goods.

The report also shines a light on some of the progress Wish has made over the past 6 months to clamp down on counterfeiters, which includes<sup>1</sup>:

- Processing more than **9,000 IP violations** that were reported via the 'Report this Listing' button, email, online web form or Wish's Brand Partner Program Portal
- Responding to **98% of all IP violation takedown requests within 24 hours**, further demonstrating Wish's commitment to promptly addressing and resolving IP or counterfeit concerns
- Issuing over **700,000 infractions** to violating merchants, ranging from impression blocking to store suspension
- Signing up more than **2,300 brands** to Wish's Brand Partner Program since its inception in 2016

As well as providing a progress update, the report looks at key trends, and provides information regarding Wish's partnerships and programs that help prevent counterfeits from appearing on the platform, such as Wish's Brand Partner Program Portal.

"We recognize customers want to purchase products that are authentic, regardless of their price or provenance. We are focused on anti-counterfeiting, and have invested in new technologies and initiatives to help us detect and remove counterfeit goods from infiltrating our platform," said Erin Brusseau, Direct of Content Moderation at Wish.

"The launch of our first 'Anti-Counterfeiting Report' is a testament to our commitment to combat counterfeiting and promote a greater degree of transparency around what is an industry-wide issue."
